

About Me

Full-Stack Software Developer with experience building secure, scalable web and mobile applications using React, Node.js, TypeScript, Flutter, and PostgreSQL. Skilled in API development, database optimization, and cybersecurity-aligned systems. Passionate about clean, maintainable code and delivering high-performance solutions that enhance user experience and business efficiency.

Skills

Technical Skills	Software Tools
Frontend: React, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS Backend: Node.js, Express.js, Python, PHP Database & Cloud: MongoDB, PostgreSQL, MySQL, Supabase Mobile: Flutter, Dart API & Security: RESTful APIs, Authentication & Authorization	Git, GitHub, VS Code, Vercel

Work Experience

Application Software Developer

Information Network Security Administration (INSA) – Ethiopia

Feb 2025 – Present

- Developed secure and scalable full-stack web and mobile applications using clean architecture and best coding practices.
- Designed and optimized RESTful APIs and database queries to improve backend performance and system efficiency.
- Implemented secure authentication, authorization, and data protection aligned with cybersecurity standards.
- Collaborated across frontend and backend teams to debug, refactor, and enhance application maintainability.

Data Encoder and Data Analyst

Private Organization Employees Social Security Administration – Ethiopia

Oct 2024 – Feb 2025

- Improved data accuracy to 99%+ by cleaning and validating large datasets with structured cross-checking.
- Reduced report processing time by digitizing and organizing records for faster data retrieval.
- Supported data-driven decisions by preparing structured reports and maintaining database consistency.

Projects

E-Commerce Mobile Application

Flutter | Supabase | Feb 2024 – Jul 2024

- Enhanced Android accessibility by building a cross-platform e-commerce app with secure login and integrated payments.
- Improved real-time data performance by designing a scalable Supabase backend architecture.
- Increased operational efficiency by implementing admin dashboard features for product and order management.

Web-Based Online Shopping Management System

React | Node.js | Express | SQL | Jul 2024 – Feb 2025

- Built a full-stack e-commerce platform with secure checkout and order tracking, supporting multi-user role management.
- Improved system performance by optimizing SQL queries and backend routing, reducing page load time.
- Designed responsive UI components using React to enhance user engagement and usability.

Job Portal (Ongoing)

React | TypeScript | Supabase | Tailwind CSS | Feb 2025 – Present

- Developing a scalable job portal with role-based access control and job management features.
- Implementing secure authentication and real-time data handling using Supabase.
- Deploying application via Vercel to ensure high availability and performance optimization.

Education

B.Sc. in Computer Science – Assosa University – Ethiopia – Jun 2021 – Jul 2024

- GPA: **3.79/4.0**
- Specialized in Software Engineering, Data Structures, Algorithms, Database Systems, and Computer Networks.
- Completed academic projects in full-stack web development, mobile application development, and system design.

Certification

Android Developer Fundamentals – Udacity | May 2024

Programming Fundamentals – Udacity | Oct 2024
